Careers in Computing DSM3

Professora Thaís Salgado

What do you do every day?

What are you doing now?

What have you done today?

How long have you been studying English?

The term "Careers in Computing" refers to the various career paths and roles one can perform in the technology industry.

What jobs in technology do you know?

I know some jobs in technology such as software developer, web designer, data analyst, IT technician, cybersecurity specialist, and app developer.

- **as (preposição)** : função/papel : *as a developer*
- **as (conjunção)** : liga ideias (modo, tempo, causa)
- **such as** : introduz exemplos

Função	Classificação	Uso	Estrutura	Exemplo (contexto tecnológico)
Papel / função	Preposição	Indica função ou papel	as + substantivo	She works **as a software developer**.
Modo (“como”)	Conjunção	Indica maneira	as + sujeito + verbo	Do it **as I explain in class**.
Tempo (“quando/enquanto”)	Conjunção	Indica ação simultânea	as + sujeito + verbo	**As I work on the system**, I test the code.
Causa (“porque”)	Conjunção	Indica motivo	as + sujeito + verbo	**As the system is slow**, we update it.
Exemplificação	Expressão (não preposição)	Dá exemplos	such as + substantivos	We use languages **such as Python and Java**.

Computing Jobs

- Software developer
- Web designer
- Data analyst
- IT technician
- Cybersecurity specialist
- Game developer
- Network engineer
- App developer

Which professional....

creates websites?

Protects systems against hackers?

Solves computer problems?

Develops mobile applications?

Skills in Computing

Attention to detail

What skills are important for a software developer?

Vocabulary – Skills, Work and Professional Communication

Topic	Vocabulary	
Skills & Abilities	skill, ability, strength, experience, knowledge	habilidade, capacidade, ponto forte, experiência, conhecimento
Software & Tools	software, tool, application, platform, database	software, ferramenta, aplicativo, plataforma, banco de dados
Problem-solving	problem, solution, analyze, identify, solve, fix	problema, solução, analisar, identificar, solucionar, corrigir
Teamwork	team, teamwork, collaborate, cooperate, support	equipe, trabalho em equipe, colaborar, cooperar, apoiar
Technical Skills	programming, code, programming language, framework, debugging	programação, código, linguagem de programação, framework, depuração
Communication	communicate, colleague, meeting, message, email, feedback	comunicar-se, colega, reunião, mensagem, e-mail, feedback
Work Preferences	task, enjoy, prefer, interesting, challenging, repetitive	tarefa, gostar, preferir, interessante, desafiador, repetitivo
Time Management	manage, deadline, schedule, priority, prioritize, organize	gerenciar, prazo, cronograma, prioridade, priorizar, organizar
Challenges	challenge, difficulty, issue, complex, overcome, improve	desafio, dificuldade, problema, complexo, superar, melhorar
Continuous Learning	learn, study, update, research, course, training	aprender, estudar, atualizar, pesquisar, curso, treinamento
Stress Management	pressure, stress, calm, focus, manage, prioritize	pressão, estresse, calmo, foco, gerenciar, priorizar
Contribution / Proactivity	contribute, participate, suggest, initiative, responsibility, proactive	contribuir, participar, sugerir, iniciativa, responsabilidade, proativo
Learning / Self-improvement	improve, develop, practice, research, self-improvement	melhorar, desenvolver, praticar, pesquisar, autodesenvolvimento

I work in software development and I focus on creating efficient and user-friendly applications. I have experience with different programming languages and I work well in a team. I communicate clearly with colleagues and I contribute to project goals.

I have strong skills in problem-solving and I pay attention to detail. I work on projects that require logical thinking and creativity. I am responsible for writing clean code and I always look for ways to improve performance.

I collaborate with designers and engineers to build effective solutions. I adapt quickly to new technologies and I stay updated on industry trends. I also work well under pressure and I focus on delivering results.

I am interested in opportunities in technology and I am committed to continuous learning. I believe in teamwork and I contribute positively to the work environment. I am ready for new challenges in software development.

My Skills for a Job Interview

Practice writing about your skills and abilities in English.

Instructions:

1. Imagine you are applying for a job in **technology** (software development, IT, web design, etc.).

2. Write a short paragraph (5–6 sentences) about **your skills** and why you are a good candidate.

3. Include the following:
    1. The job you want
    2. **skills** you have
    3. **things you enjoy doing** at work

4. Use **present tense** verbs.
