resultado	Present Perfect	I have finished the work.	already, yet, ever, never
duração	Present Perfect Continuous	I have been working for two hours.	for, since

Working in a Technology Company

Maria works in a technology company. She works with software developers and designers. Every day she analyzes data and manages projects.

Right now, Maria is working on a new mobile application. The team is developing a platform for small businesses.

Maria has worked in the tech industry for five years. She has managed several projects and has improved many digital systems.

Recently, she has been working on an artificial intelligence project with an international team. They have been collaborating on this project since January.

Maria enjoys working with innovative technologies and learning about new tools.

No texto aparecem **3 tipos principais de preposições muito usadas no inglês profissional:**

1. Preposições de trabalho

•work **in**

•work **with**

•work **on**

2. Preposições de tempo

•For

•Since

3. Preposições de tema

•learn **about**

1.Work **in** (field / company)

work + in + place / field

Exemplo do texto

Maria works **in** a technology company.

Maria has worked **in** the tech industry for five years.

I work **in** Google

Significado
Trabalhar **em / dentro de uma empresa ou área.**

Example	**Meaning**
I work **in** a bank.	Eu trabalho **em** um banco
She works **in** marketing.	Ela trabalha **em** marketing
He works **in** the tech industry.	Ele trabalha **na** indústria de tecnologia

Work **at**

Preposition	Use
at	company name
in	department / field

~~I work **in** Google~~

I work at Google

~~*work at the technology industry*~~

work in the technology industry

~~I am working **in** a project~~

I am working on a project

2. Work **with** (people / tools)

work + with + people / tools

Exemplo do texto

Into vs. **In to**	He walked **into** the office. (Ele entrou para dentro do escritório.)	You must log **in to** access the files. (Você precisa fazer login para acessar os arquivos.)

Texto para atividade da aula (Reading – Technology)

AI Tools Are Changing Work in Technology Companies

Technology companies are using artificial intelligence to improve productivity. Many teams work on automation tools that help developers write code faster.

One example is Axiom AI, a platform that helps users automate tasks on websites without coding.

Companies use these tools to save time and manage data more efficiently.

Developers work with artificial intelligence systems every day. They analyze data, test software, and deploy applications.

Right now, many startups are investing in AI solutions for programming and automation. Investors are supporting new companies that build intelligent tools for developers.

These technologies are becoming part of everyday work in the technology industry.

Atividade 1 – Identificar Present Tenses

Atividade 2 – Identificar Prepositions

Atividade 3 – True or False

1. Technology companies are using AI tools.
2. Developers never work with AI systems.
3. AI tools help automate tasks on websites.
4. Startups are investing in artificial intelligence.
